

## How to change port number of Tomcat Server manually: -

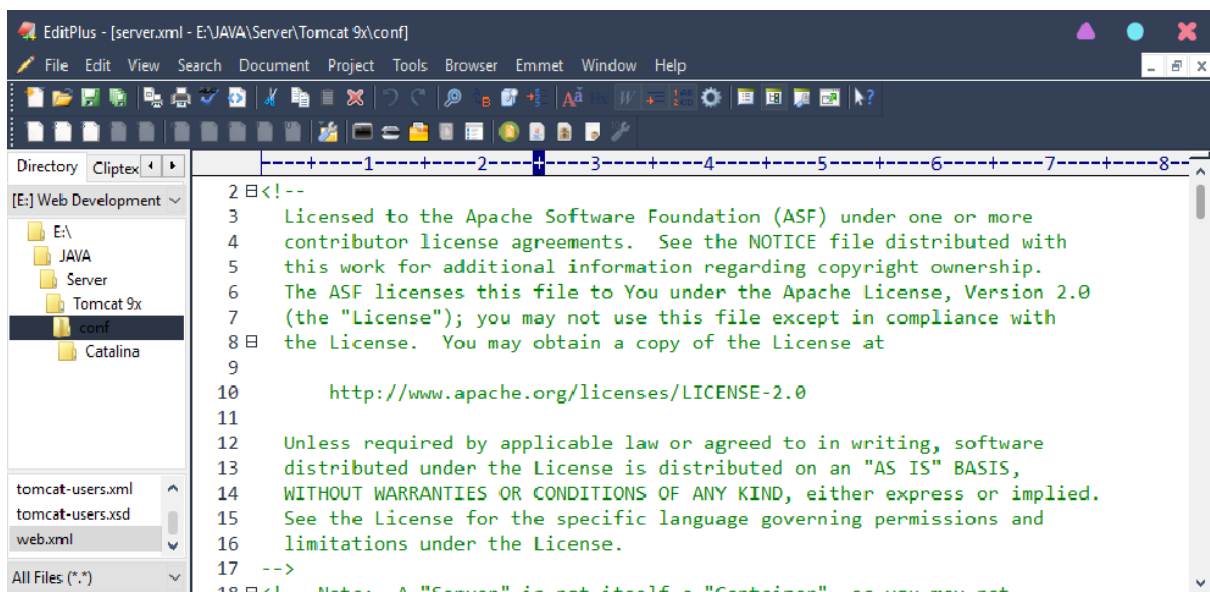

Step #1: Open the <Tomcat\_Home> folder then click on conf folder

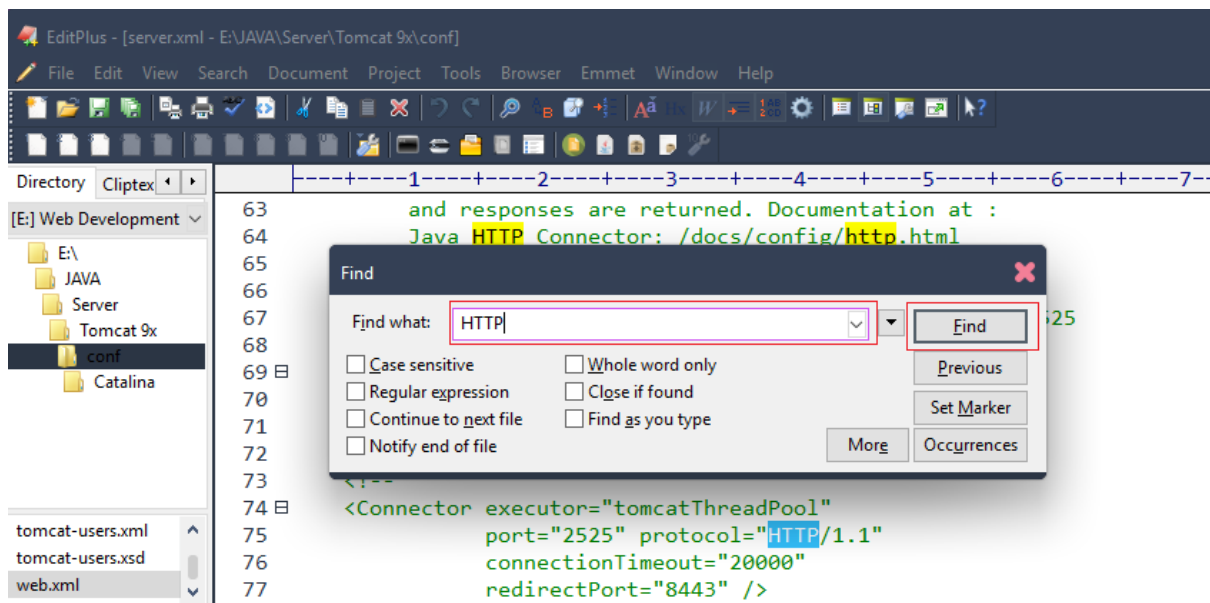

Step #2: Click on the server.xml file

Step #3: Open with any editor, or with Notepad also

Step #4: Find the "HTTP" by pressing shortcut key ctrl+f

Step #5: Change the port number and Save the file [ctrl+s] and close the file, your port had changed.
